What could the problem be? It could be so frustrating most times especially when you want money for an emergency. The app keeps saying "sorry an error occurred." You can't log in. Next, if you eventually get in, the service stops abruptly and you can't complete your transaction. This has been going on for a week now. What exactly is the problem?:

Kizito Peterson:

Score - 1:

Date and time - 2023-07-03 05:08:53:

This app has lots of bugs and very poor UX. After downloading this app, I can't log in because it keeps requesting a hardware token. Meanwhile, there is an option to input card details but it doesn't work. Even the soft token doesn't work and Zenith's Customer care unit has no solution. Very annoying.:

Review number: 3

Onyinyechukwu Ike:

Score - 3:

Date and time - 2023-05-21 04:37:54:

I formatted my device, and I've tried to log back in... and when I try to register my device. It keeps saying 'only hardware token can be used to authorize the request' when I try to use my card details that was asked for. I don't know the meaning of hardware token or how to get it. I need the app a lot as I use it for a lot of transactions. What can be done about this? Sometimes, using the app to buy airtime, the transaction would fail, yet I would be debited without being refunded.:

Hei,I think zenith bank should go for a better upgrade of this app.It could be frustrating atimes for business.Transaction history does not show or at best erratic display,sometimes transfers show successful but not debited,pin input enters nullity at other times etc.The iPhone version of the app is quite good and flexible.My wife uses it without problems. I use the android version on my galaxy fold3 fone and it really sucks most times. I hope the tech department of zenith bank gets to work.:

Score - 4:

Date and time - 2023-03-14 03:02:20:

Sincerely, I must agree this is a great app, with good graphical outfit couple with ease and fast transactions embedded but interfacing regular use of the app becomes highly problematic. It refuses to open most times and owing to the cashless economy that's at play right now, I thought the update would include upgrading the accessibility aspect of the app but yet, it refuses to open most times despite stable network. Please fix this soonest.:

Review number: 6

Nwabueze Chukwura:

Score - 3:

Great improvement on this version. Suggestions/glitches: 1) Transaction history couldn't be expanded nor downloaded as to enable transferability of individual transaction to other party. 2) In-app Bill payment routes are not user-friendly. For example, the airline and cable TV that I'd tried so far. Aside these, to me, it's a great app. Thanks:

The app is really good. I suggest that your regular update will enable the app to store and retrieve the account numbers of previous transactions within the app. At least one does not need to go through the stress of copying account numbers from outside the app. Better still, make the account numbers of transaction history retrievable for the purpose of making subsequent transactions easy. Thank you.:

Hey zenith! Want to say I like your app but for one thing. Please fix transaction history. Its rubbish. Sometimes they don't show up and when they do, it's almost useless. No information, just a set of numbers. Completely annoying. Please look at UBA and learn from how they display transaction history on their app. So seamless and has all the information you need to recall a transaction when u click on it. When u click on yours, nothing happens. Fix it please NB: I have the latest version.:

The purpose of an application is to facilitate matters for the consumer. It all looks pretty until you start making online bill payments and airtime recharges. Particularly with KEDCO prepaid, endless error messages, failed transactions, debit and reversals and in the end a simple transaction fails simply because glitches are not addressed properly. In case you are wondering, this issue surfaces frequently and has been for two years. Meanwhile, I'm home without light thanks to your efficiency!!!!:

The app was working well before, but recently I'm so surprised that the app is not working up to expectations. The annoying part is each time you change your phone you need to visit the bank for activation something they can just send a software token to the registered number to activate your new device which other banks are doing for convinieny. I'm sick and tire of all this stress. You guys need to step up.:

I really don't like this update. It is just fancy not functional. Too little space to view Account History. Cash payments don't update in real time. All credits appear as 12noon before updating in real time later in the day. A lot of the tabs are just taking up unnecessary display space. Take off icons @ the base of the app n email statement. They're still in the side bar. Minimize or reduce the select range icon. I am more interested in my account history than anything else. Really poor app?:

This app is great, but it needs alot of improvement, like the loan option should be included in the app for easy access, cos most times, the USSD option fails and that can leave u stranded when u really need help, and there is no customer service hotline on the app, incase of emergency, that would be really vital. They should add a customer service hotline and a loan option on the app and I will rate 5stars by then, but for now, manage these 2star.:

Never enjoyed this bank since I opened it. It has always been one problem to another. Worst of it all is that the bank isn't digital. Customers can't get minor issues solved without visiting a branch. I mean, this is 2021. What's the use of a bank that can't resolve minor issues digitally/online? Also, your app doesn't have link of contacting true handles/contacts of support. So customers will have to use Google to search for means of contacting you? Making it easier for them to get frauded.:

Exceptional but with one concern. It might not be an app issue but NIP transfers take minutes before they impact beneficiaries. This is not the case for other apps I've tried. Failure rate is zero for all transfers by me made via the app so far.:

You should do well to change the sign-in process. We don't have to go through the stress of putting 10-digit account numbers before we can access our accounts. Speaking of access, the Access Bank app does that very seamlessly. Almost every and any other Nigerian bank has made their UX very seamless and stress-free. Have you seen the Kuda banking app? Sweet! Clean!!! Muah!!! I urge the Zenith Bank Dev team. Copy those guys! You guys are already doing well. But you can do better.:

One star - Too bad. I was enjoying this app when they just launched the mobilebapp Platform. But things go worst with each new update. You can't even send your transaction history to your email. Even though a window was created for this. Zenith make una dey try. It's not so with other platforms. You get a new phone, you can't pot easily without visiting their bank Please I am looking for zero star.:

Zenith Bank seems to be getting worse by the day. I've tried severally to download this mobile app. But because I've used it on previous phones (which either got lost or stolen), it doesn't log in. The USSD doesn't work all the time, and transfer almost always fails. Always has dispense errors and when you go to the bank to complain about the fact you are stranded, the staff treat you like you are over reacting. Always keeping people stranded. Even Ziva, the WhatsApp, I don't know what she's doing:

I'm highly disappointed with the app. i wrote a review this morning (14/12/20), it was removed. I wouldn't know how. Zenith Bank mobile app uses to be the best but not anymore with this last update. I can't log in without making several attempts. As an Engineer, I transfer constantly to my workers. That has become a tug of war. If nothing is done to correct the error, you may lose a lot of customers. Truth is bitter. If you like you can remove the review again. The app is working fine now.:

This is the worst I have experience across banking apps. Worst is that I still contacted their customer care on their website and they bluffd me. This is soo so bad. That we can't access our mobile banking app for about 73hrs now. I use 4g on a Huawei P20 fone. I currently have 15Gb on my data and all other tabs run smoothly and nicely. But knowing I can't access my account on my mobile platform fir 3days now and still can't be helped by the customer care is so appalling. When pride comes in.....

Hi Zenith bank. I don't have issue with the app. I was using Tecno Spark 4 with the Zenith app and everything was fine. I later changed my phone to Samsung Sledge and I can't log in. It says register device and when I try it brings pin+token and card details. The card details will say only hardware token can access this device and I don't understand the token aspect. Where is the token coming from. Thank you:

I changed my phone recently so I transferred my Zenith app to the new phone so when I wanted to log in it was asking for card number and pin or token number. I don't know anything about the token number they are asking. I input every code I know that links to my bank but no working. I input my card number and the pin but not going through. I even downloaded another app but still the same. I seriously don't understand and also the normal code is not also working for me. I have not been able to transfer or do any other thing and going to the bank is frustrating. I need a solution.:

why id Zenith not responding to the many complaints that has been accompanying this new update? Your customers has been complaining since the launch of this new version and nothing has been done in the past 17 days to make the app all device and network friendly. I have not updated my for fear of being logged out completely. please work on the app to serve us better, you didnt make the app for yourselves but for the customers. And the negative feedback so far outnumber the positive ones. thanks:

The app is very stupid. I can't login always throwing up errors. And so stupid it can take hours to approve transactions. I wanted to sign in my zenith Bank account, it presented hard token or card details but when I tried card details it said no. That I need token. So disorganized bank. You really need to improve in your services @Zenith Bank. You used to be my best bank. But lately you guys have been misbehaving.:

I'm beginning to dislike zenith bank. 2020, they debited 10,000 from my account and could not account for it. This morning I made transfer from my access bank account to my zenith bank account. Access bank has done their part, I am yet to see my money reflect in my zenith account. The app isn't even opening. Everything is on stand still. And mobile banking is saying some amount has been debited. I won't take this trade this time. I need my money and I'm closing my account.:

The most stupid bank ever, you can get stranded if you depend on this foolish app, they have network maybe once a day and pretty much that's it. You can never do transaction anytime you want, you'll be lucky to even be able to sign-in. You better go and open KUDA because this app is a disappointment.

How could you even be the bank of the year (2022). All of you from your manager to the cleaner in your office, na thunder go fire una, my 7500, una no refund am, my 2K una no still refund am.:

Good day admin I have a complaint. I have an account with zenith bank, but I've never received any alert neither debit nor credit and I've been carrying out transactions. I tried using the shortcode to check my balance but I was told I do not have an account. I even tried registering mobile banking but all to no avail! How is this possible please?? I need answers please!

Most of your customers complaining here are either asked to screen shot and send or they should clear their data and cache, isizit that non of your personnels are using this apps? If it not the app it's the card or network. Whata hell!! Can't you learn from other Banks? I have so much admiration and respect for Zenith Bank and I'm really disappointed that such an international bank could be using this wack. So frustrating and annoying. Honesty!:

Is this "register new device" a deliberate act or just nonchalance? I am so pissed, this is a Friday night and, I am supposed to pay for some things online, but got stuck because I am getting a message to register new device, by using a token or atm card which I never had, because I had bypassed it already; am I not the one using the device to know if it's a new one? I am disappointed, and truly sorry for recommending this app and bank to people!!:

Is it a crime to change my mobile device? My wife and I changed our mobile devices, now it's mandatory for us to link our new devices to the app. I went to the nearest branch, they informed me it's gonna work in few hours time. Now over 24hrs, nothing happened, called the customer care line, nothing changed, chatted them online, same thing. I promise them that they're gonna lose 2 good customers in 2days time. Must I go to the bank for something that's so trivial like that all the time?:

Dear Zenith bank, there should be an option for users to be able to access their account manager! I don't understand why I would be using a bank for years and cannot easily access my account manager! Please kindly look into this and include this feature in your bank app. Until this feature is reviewed before you can earn a 4/5 star.:

I would have given this no stars, if it permitted me. It is ironical that after the Zenith PLC sees all these negative reviews (of all worst reviews ever, these are the worst of the worsts) and still haven't fixed all these or revert to the old app. I came to check other reviews thinking my case was peculiar only to see others. The country is failing us, and now our banks are failing us.:

No doubt, Zenith bank is gradually becoming the worst bank in Nigeria. Imagine waiting a whole day to login into that stupid app, & they'll always tell you no network inside that stupid banking hall. For sure, you've become my least option for receiving & sending money. Other banks are way more reliable. I could've rated this app (-). Rubbish!

Maybe if we all report this app on Google play store for fraud and scam, Zenith bank will sit up. Illegal deductions from account, otp takes hours to come, I get debited for airtime and data without receiving it, failed transactions that never get reversed, network issues that leave you stranded all day, etc. Look at the comment section on their social media pages, Zenith Bank is a mess, I do not recommend Google play store should just take down this app let us rest:

Terrible banking service of late. First my money of N38,500 is still not refunded to my account. Secondly, your mobile app has a mind of its own, only opens when it wants to. Thirdly, you guys are terrible on small loans to your customers bcuz you don't give out loans. Finally, most of your customer officers are very rude! And lack training in the field of respect and customer relationship. They act like they're doing me a favour when in fact, I'm the reason for their employment! Useless!:

Having manage to overlook the honest reviews here and downloaded the app, I deeply regret wasting my 68mb. As in why do we have to pay #1,500 (on playstore) or #2,500(at the bank) just to get an e-token because you want to use the bank mobile app, that you'll still be charged for transactions oo. Why is Nigeria like this for God's sake? Always looking for ways to milk ordinary citizens. Hian!:

Why would Zenith bank make us update an app tha is eventually not useful. I can't register my device... Why? Is it until I use an iPhone or a Samsung S9 before I can register it? I need to do transactions now and I can't... Why??: If I had known, I would have not downloaded it. Its painful, very painful. So what do I do now, please I need a response... What do I do? How do I make transactions when I am not close to an ATM at the moment..? Please, advise me?..

zenith community loan & savings house is the worst bank ever, early last year I was debited for 5 transfers via paypal that was never sent, almost one year now still nothing was done even when I've filed many complaints. Please don't open an account with zenith cos you will surely regret it, however I must pursue this to the end as I have all evidences to win them in the court of law. Am giving them grace to rectify this criminal act before I seek for proper Legal redress. Chukwuemeka.:

I made a pos transaction on the 6th of March I was debited but the pos attendant said the transaction didn't go. Been calling customer care . They will tell you to wait for 20 to 15 mins, once the time is due they will cut the call. Please I have spent almost 2000 naira calling to request for a refund of 20,000.
Please you guys should attend to me and refund my money plz, I seriously need it. Thank you:

This is totally unacceptable, it has the worst customer care support so far. They like posting customers, my experience this Last few weeks has been horrible. If it were within my power I won't give any star at all cos they don't deserve it. At this 21st century, bank like this can't attend to customers online and solve their problem, ordinary reversal of fund for more than two weeks now is hard for them to do. Ur email, social media platforms sucks with live chat not working at all:.

Logging into Zenith app now is a biillig issue. The network problem is becoming worse by the second! I can't log in for a long while now today. So poor and so disappointing! And no apologies come from Zenith regarding their poor services. So arrogant in their way of operating and that spells a possible collapse since they joke with customers now that they think they are the "best". Access bank wld snd u notifications. So do other banks i use. No apologies, too arrogant! Something mst be dn fast!:

Already a customer of d bank, yet get adverts every nw n then. That compel me to giv a verbertim though. Kudos to Zenith bank. I enjoy unique benefits just by having a salary account wit them. This financial institution actually has their customers at heart. I'll love to knw about ur loan packages though. But i guess i can always search d internet or visit a zenith bank branch for detailed info wen i'm actually ready. Keep up d good work! But always remember to continually put #customerfirst:

I think Zenith Bank need to work on themselves. Your bank is most worst bank in term of Network &hacking. boys quickly have access to someone account without owner authorised. When you are credited in the morning you will receive alert in the evening and the money will not drop to your account even though you check your balance. In end here I think the bank need to work on IT department something is wrong somewhere. Even App is not functioning well as earlier complained by others user .:

Zenith is not it at all a bank that cannot give facilities to its customers isn't it! maybe shortly it will close my zenith account for good, there is no need running it when they cannot assist a customer with loans, that's why I refuse allowing my payments drop in zenith, it drops in access when I get help from Zenith is just

a fancy bank and that's not needed now, customers need a bank that provides a shoulder you lean on in times if need, so zenith is out, this is my candid opinion ok, so I rate zenith:

Very useless mobile bank app. There's provision for card activation but yet one can't activate until you go to the bank to get a token, besides Zenith Bank USSD code network kept on going off whereby if you rely on them to eat that day you'll die of hunger because every money you withdraw is hanging and no reversal is made. When you call their customer care lines, you'll always be number 36 waiting on call. Why add to the frustrations of Nigerians? Can't you people do it better?:

Quickest way to dupe you is to use this app. I've used it for Data and others, you will be debited and not getting the Data or recharge. They will promise to refund but till thy kingdom come. Zenith is a fraud. #BoycottZenith. Hello Nigerians, I just contacted Google now, flagging down this app as dubious. I needed 1k people to sign petitions for Google to delist this fraudulent app. Kindly do so reach me on Facebook profile Ricky Awodi:

I hate to say these but with the frustration this app can cause, you would do the same. that i regret banking with zenith bank. The mobile banking is far more worst than any other mobile bank i know. It called mobile banking for a reason,but it kinda works most during Naija working hours . imagine you are outside d Country? So annoying and embarrassing. Imagine not to be able to operate ur own hard earned money. And the customer care will come here and act as if they care. dnt even deserve 1?:

If you are incapable of rendering e-services to your customer, then quit: not denying access to your customers hard earned money. You can spend billions of naira annually marketing to gain more customers but you can't spend a dime to upgrade your services, and meet with the growing demands of your customers. The Nigerian sickness indeed. Just like I did with access bank, which from recent findings is better than zenith bank, I will dump you for other less saturated banks. So annoying ?.:

My name is Ogboenoku onoriode. I was debited 15000 on the 16/04/2022. I contacted customer care about it the bank was not saying anything. They told me that they we check up till now no replies. Now today the 13/08/2022. I was debited 1478 by same person. What is wrong zenith Bank PLC. This is the hand work of the staffs. Please Federal government of Nigeria should close the bank form defrauding people form their Money please.... And the funny part of it the customer care are not doing anything.:

Very disgraceful that an African Bank will not use Black African models for their app. You open the app and the first model is a foreign woman. What sort of shameful message are you sending to your African girls and children. Shameful for a bank that wants to be global but already forgetting its roots.
Disgraceful. Are you ashamed of yourself skin colour? Do you wish you were white? Shame on you zenith bank. Shame on you!!!!

The worst bank ever with bad customer care. Collecting bribe before giving you entrance. Ebonyi state, Abakaliki branch i just hate the bank no wonder Access bank is getting more customers than them. God have mercy on Zenith bank keep loosing customers every day i advice you work on your staffs so one wont be make you lose millions of customers in just one day, security people are really the worst collecting money before attending to someone.:

You are such a wack bank. Your entire internet banking system has been down for almost two weeks and you are yet to get a solution to it. In 2021 seriously? If you were hacked, pay the ransom fee already and learn to beef up your cyber security department going forward. So frustrating:

Zenith Bank is the worst bank you can ever entrust ur funds with .they just allow any firm or company to take funds from your account without even asking for you if you made any deal or transaction with the firm or company in question.i have been a victim of this casualty.not even once or twice its concurrent.nd

this nonsense happens anytime i receive a credit alert.its as if they are monitoring me Ps.i have proof of this.DONT BANK WITH ZENITH,THEY ARE THIEVS.my 5 ? is for my writin not theirs:

Zenith banks are one of the worst bank in Nigeria. Has a federal or state government workers whose salary account is domicile in their bank,they will not/never grant you any loan. And your salary account is with them. They are very useless. Reason many federal government workers are moving the salary

account away from Zenith and going to Get. I have a salary account with the since 2015 they have snevwr granted us loan,if i apply they will be giving stupid story and excuses.:

Zenith bank,Why was I debited for stamp duty twice within 2 weeks apart on the 18th July 2020 and 1st August 2020????? This is fraud. Iv never seen where stamp duty is debited every 2 weeks. I demand that my money be refunded. #750 was taken on the 18th July and #700 on the 1st August. This is crazy

Zenith bank. If i don't get a reversal within 48 hours I swear I will stop banking with Zenith. I thought Zenith was prestigious. Found out they are cheats. I am waiting for a reversal:

God punish all of u that is in charge of this zenith bank? just look at the way u remove money from my account all in the name of sms fee and after every transaction u remove 10.75k and sometimes 20.75k.... Even if I transfer from zenith to zenith on bank app for that matter, u still remove charges... And after everything u still comeback to withdraw money for sms fee?... Once again may God punish u all?... God punish u all?..:

Indeed for some months now, i can not share the receipt for a transaction to my contacts or any other app on my phone. Immediately after a successful transaction, a receipt will be generated, it can only be downloaded but cannot be shared with the recipient or any other app. This is ridiculous indeed as it has a
bottleneck for some time now and seems like ZENITH BANK is not doing anything to rectify this issue as take. So disappointed indeed.:

A complete fiasco! Isn't there a zero rating alternative? No, I didn't come here about the mobile app. I'm here about how frustrating the network issue has been over the past months. You can bet your neck that it'll always cost you heartaches and a feeling of utmost helplessness whenever one needs to transact with the USSD code alternative. This poor network issue has costed and is still costing me more than my funds! Dam! I'm quitting my partnership with them soonest! It sucks! Terribly sucks!:

Zenith bank app just became a shadow of its former self. It's very disheartening to say the least of how your services has dropped recklessly. The disgusting part is how it still doesn't seem like y'all care about it or effect visible positive changes. I've been with this bank since 2005, it used to be my go-to bank for transactions until this very moment. Now, if your app isn't killing transactions at point of payment, your card is keeping you stranded and embarrassed in front of a cashier.:

This is very helpful it's like bringing the bank to your doorstep 24 hours. 1. A faster signing in process will be good 2. I should be able to access full account records for as long as I've been keeping my account with Zenith 3. Extended transaction records beyond the few available now. If this are achieved, a 5 star rating maybe feasible:

This newly updated app is getting me sick, the app keeps rolling irrespective of the strength of the internet, this upgrade is unwelcoming. My Balances ain't the true reflection of what's in the account.:

I wonder what is wrong with you guys. This app used to be a great one. Now I can't login. Ussd code not working. I was told no account linked to my number. The same number I have been using to make transfers. It's pathetic. You should fix this. Am so disappointed. Dropping the ratings to a star ?:

I need help. This app will no longer work on my galaxy Note 10 plus. It just keeps loading and never even gives an error message. I have contacted customer care 4 times including by mail but no one has been able to help me. I have cleared data and cache, reinstalled, restarted, done everything I know how. It is the only app that won't work on my phone:

This app has been working quite nicely until recently I would log in and it takes forever to open, often times it just keeps running like the it couldn't connect to the server or something else. It's so annoying that the once wonderful app has become lagging.:

Honestly, since you updated the app, it has not been smooth as it was before. In most cases it refused to connect giving error message: network not available. Reconnecting.... And remain like that until I have to switch off the phone before exiting. I have not enjoyed it at all. This app has not connected for the past three days now. You guys need to review this app.:

Your app is the worst bank app..almost everyday one cannot login and this thief cbn governor wants us to be doing transfer with this kind of stressful app.:
Review number: 13191
A Google user:
Score - 4:
Date and time - 2019-09-06 12:16:11:
I love every other things about the app. updating, what I don't like about it is, I only have my current balance, there no balance for every transaction, do something about it is very important.:

If I could I will give this app a zero rating I was helpless during the holiday and needed to buy airtime and do some transfers all to no avail. I could neither use my mobile ussd nor the mobile app. Zenith bank is completely hopeless not to talk of their customer care, the lady I chatted with online ignored me for minutes and didn't even bother to help me find a solution.:
Review number: 13957
A Google user:
Score - 1:
Date and time - 2018-08-07 12:05:13:
This app version is too old compared to other banks I just opened a zenith bank account last week and downloaded their app, imagine my surprise when i realised they don't have biometric log in? So many errors while trying to do one thing or the order! From a bank that claims to be the best, I'm woefully disappointed????:

A Google user:

Score - 1:
Date and time - 2018-08-25 18:14:48:
It's frustrating anytime I want to make transfer. You can hardly make 5 successful transactions without the app crashing. It will show network error and I will be debited. Any little fluctuations in network it log you out.:
Review number: 13963
A Google user:
Score - 1:
Date and time - 2018-09-04 23:31:21:
Very Terrible lately. I'm uninstalling till you improve. Can't load bet funding, can't login. Always replying error and closes at interval:

I had to write a review. The User interface of this app is the worst that exist anywhere. I thought the functionality of it will knock out its whack UI. But No, they describe their own error messages like its your fault e.g Network Error, activate your mobile no...when I need to try ten more times to login successfully. Good side, my transactions have not stuck yet. Please Zenith catch up. Thanks:

The app is easy to use but I abandoned using it due to the fact that it doesn't generate Receipt when payment is made and the message that states the transfer is successful also has the account balance, hence couldn't be screen grabbed. They should work on that please.:

This app is very poor.... I expected more from this Bank Pls update this app You're making me wish I had an Access Bank account instead because that app is beautiful compared to this garbage you guys call an app I even had to come back and check to see if this was the official Zenith Bank app cuz it looked like a very fake thing Pls update this app It is SEVERELY outdated:

best among the rest, among all the nigerian bank apps I've used, this tops the list. its smooth and very easy to use, Thumbs up guys.. Sometimes this new one displays error but the transaction still goes through. This is bad. I gave 5 starts to the older version, im taking back 3 stars. Fix this:

Rubbish.. After going thru registration process successful, I try to transfer money to UBA account number and after the transfer I still have to confirm my transaction by dialing short codes which didn't work. I have tried several times but it is not working. Here my suggestion. The App should be make simple and all the transaction confirmation should be within the App not necessarily dialing short code. The error message was that is should check my token. And most times I don't get any error message:

Great app dats made my life easier to transfer and receive funds but it has a FUNDAMENTAL FLAW. When I type in the Acct. no of someone to whom I want to send money to, no confirmation of the Acct. name is asked for. Just one wrong number typed in error and I could send money to the wrong person. To

get it back go be wahala. So please put in a next step for Acct. name confirmation before money's sent.:

Can't remember when last I went to a bank, u can do virtually all transactions easily at your fingertips. I have 2 questions: (1.) Pls my transaction history does nt show more than 3 transaction on my android phone bt shows all on my iPhone (2.) I can't setup a standing order in recurring payment (it only pays once). Pls help rectify this issues:

I actually prefer using the mobile app to the desktop ibanking platform. It's so user friendly. You can transfer to other banks without saving the beneficiary (and then you get the prompting to save or not which I love since some transfers are one-off) so it saves you having to come back and delete the beneficiary.

As my children will say "Good job!"

Eventually after days of frustration, I was able to get the app running. I had to uninstall and reinstall it then things started running as they were. The app is really nice and smooth though taking longer time to load than the old one. The developers need to work on the red colour that appears behind the logo at first launch, it's kinda scary, maybe make it more lighter or do white and interlace it with red. Outside that you have a perfect app.:

I guess you guys should make a feature of complaints available so we dont have to walk-in all the time we have to complain about something or make a request. Comparing with GtBank app, I think its more or less supposed to be a one stop bank..... I need to be able to purchase my flight tickets at discounted price and all other things like cinemas and stuffs. Thank you:

There's no issue regarding not been able to confirm acc details before your transaction is completed, however, there's an automatic update of the acc inform if you select "other bank" (in situation where the acc is not zenith acc), hence there's no flaws on that issue as regard confirmation of acc details, even the previous app has that function. Cheers.:

The app as been so complicating. I had to uninstall from one Android to another now it's frustrating. Pis if the app manager could help me bcuz I can't even access my account again. Although, I reinstalled the app, now it opt out a message saying 'this account can't be used up to 3 devices'. I need solution and it's urgent and if you can also help with checking why I can't make transfer. Thank you!

Well, I have been using this app for close to a year now and its been helpful, provided I'm using the same Sim I used in registering I don't have any challenge at all. I just got a new phone that uses two sims, downloaded d app and logged in and there, I had no problem. Just make sure u r doing the right thing.
Its not magic, its technology:
Review number: 15744
A Google user:
Score - 3:
Date and time - 2015-09-08 02:20:49:
This is actually a very nice app but the only problem i have is whenever i try to use my second sim to access it i get a message 'please register your device first'. This days alot of people are using a dual sim phone where you can switch your data to any of the sims. Making the app registered to only one sim is a lil boring. Please if you fix in the next update. But generally a very nice app.:

Still surprised as to why I have been unable to log in despite waiting for more 24 hours as my banking officer instructed. Pis can someone help me here. System repeatedly told me this account no is not allowed here. It says i should visit or call. I did call at lekki branch. I was told that my banking officer/my branch will help out. But I am surprised that upto now both my banking officer/okota branch has done nothing about it. My formal banking officer was right asking me to switch to his new bank.:

I need you to help me fix a problem of error message that keeps showing up anytime i try to make any transaction... After successful completing my first transaction , the application has failed to receive my password and I've been trying so hard, went to complain about it in your branch In akure, i was told to Uninstall and install again but still same old story:
Review number: 15748
A Google user:
Score - 1:
Date and time - 2015-09-22 01:42:21:
It's pointless when it can't be used on multiple devices(more than 3). The pin+token is enough security so don't understand why. Its also useless if it keeps instructing an existing user trying to login to re-register the device again. That prompts me to delete and reinstall and now it says i cant register it since I have done that on 3 devices. I've only ever had it on one device but been forced to reinstall on 2 occasions and now it talking nonsense, saying ive registered 3 devices.:

The app is ok. The challenge I think am having here is dialing of code. Its disgusting. I was unable to make transfers. The code not working. I don't even like the idea of using a code confirmation. Its disgusting. My other bank (diamond bank) don't use any code dialing confirmation. You can use it anywhere, in Nigeria and outside Nigeria. Zenith bank should please do something about that. You are bigger than that.:

It's funny how Zenith responds to only good reviews. I can't do anything with the app. As a 1st time customer I am required to dial a code sent to my registered phone to initiate a transfer, I dialed severally and it keeps saying request not completed. Why will you make things difficult for users? Thank God for ATMs. I will take all the money out.:

The UI is crisp and clean. Instructions are clear. Of course the user will need a strong internet connection to avoid hitches. However, I encountered an "Internal Error" upon processing a transaction. Which almost led to a duplication payment. I received a message from the App that there was a possible duplicate and I should check my balance. Good thing there wasn't. Overall good App. Needs improvement.:

This app is just trash except zenith bank upgrades their system . Once I needed to make an urgent cash transfer and I registered the app on my GF's phone,now I have downloaded the app on my mobile and am unable to use it cos it says am already registered meaning I can only use first phone in which I registered? That's just gross u can't call that security measures. This is the 21st century where people ditch their old mobile for a newest version.:

Sometime ago I rated the app one star because there were some challenges with it. But now, I've not installed any better application than this. I works perfectly. Even when u forgot to log out it makes sure that no further transaction is done on ur account once ur phone is locked. When u reopen you'd have to impute ur password again to avoid a 3rd party snooping on ur account due to ur own carelessness.:

Finally Zenith Bank stepped up. I didn't like the mobile number registration thingy. The option to use ibank was the game changer for me. At least I'm sure of my security since you must authorize all transactions with your token. The other issue I would have complained about was about switching devices and the support team has said to contact them on this, so once more... Kudos!!!:

This app has saved me so many trips to the bank. I have hardly ever had cause to be disappointed when doing cash transfers especially within ZenithBank. However the app is only useful for money transfers. Do NOT buy airtime on the app. You will lose your money and even Customer Care cannot help you get it back!!!
Review number: 16362
A Google user:
Score - 4:
Date and time - 2014-10-02 00:54:14:
Nice application and work perfectly. You need to review or remove the bank charges on transaction within the Zenith bank account. For example: Transferring of N1000 from bank to eazymoney attracts N100 fee which is ridiculous.:

This app works perfectly. However, checking balance seems to be a problem. I only managed to do that once since I installed the app. A new update is needed urgently for balance check on eaZymoney & bank accounts. We also need to check last 3 or 5 transaction on eaZymoney & bank accounts. Oh I think I got it somehow - though not easy since it needs pulling down the letters and refreshing. Great App - needs to score as high as 4.7:

As expected, everyone wants my phone number. Another BAD APP. You must look for a way of authenticating people without asking for their phone numbers. We already have enough codes to cram on your ebanking. I think you should be able to adapt them for this mobile app. Asking for phone number (just like Quickteller) is not imaginative at all. The same reason I never bothered with it I'm UNINSTALLING. When you guys find an intuitive way of doing this, let me know. Otherwise, I'll stick to ebanking on the web:

Been waiting eagerly for this app to go live in the Major App stores and now it has..... The app is indeed an Industry Leaderand surely will only get better. Well done !!! Suggestion: I think it'd be best to integrate the merchant and biller codes for various purchases and bill payments. That would enhance the user - friendly experience generally.

Sets the bar a notch higher but i'm sure these Zenith guys have a lot more up their sleeves in the coming weeks. Its original. Its also secure, intuitive, crisp and clean. Its probably the only app supported on both very old Android OSs and economically friendlier phones with small screens like the Huawei Gaga but also on high end Samsungs covering both customer segments - catering for everyone. Well done Zenith team, well done. Suggestion - please don't make us have to go to a branch to link our account to wallet.:

For Safety sake what does a banking app have to do with add, edit and delete contacts? Shared media? So it can also view and edit my pictures, files and folders? Please be careful dis app will steal your contact and photos because it has unfettered access to these info. Developers tell us the truth THIS IS A SPOOFING APP not a banking app. USERS BEWARE:
