What could the problem be? It could be so frustrating most times especially when you want money for an emergency. The app keeps saying "sorry an error occurred." You can't log in. Next, if you eventually get in, the service stops abruptly and you can't complete your transaction. This has been going on for a week now. What exactly is the problem?:

This app has lots of bugs and very poor UX. After downloading this app, I can't log in because it keeps requesting a hardware token. Meanwhile, there is an option to input card details but it doesn't work. Even the soft token doesn't work and Zenith's Customer care unit has no solution. Very annoying.:

Review by - Onyinyechukwu Ike

Score - 3:

Date and time - 2023-05-21 04:37:54:

I formatted my device, and I've tried to log back in.. and when I try to register my device. It keeps saying 'only hardware token can be used to authorize the request' when I try to use my card details that was asked for. I don't know the meaning of hardware token or how to get it. I need the app a lot as I use it for a lot of transactions. What can be done about this? Sometimes, using the app to buy airtime, the transaction would fail, yet I would be debited without being refunded.:

Hei,I think zenith bank should go for a better upgrade of this app.It could be frustrating atimes for business.Transaction history does not show or at best erratic display,sometimes transfers show successful but not debited,pin input enters nullity at other times etc.The iPhone version of the app is quite good and flexible.My wife uses it without problems. I use the android version on my galaxy fold3 fone and it really sucks most times. I hope the tech department of zenith bank gets to work.:

Hey zenith! Want to say I like your app but for one thing. Please fix transaction history. Its rubbish. Sometimes they don't show up and when they do, it's almost useless. No information, just a set of numbers. Completely annoying. Please look at UBA and learn from how they display transaction history on their app. So seamless and has all the information you need to recall a transaction when u click on it. When u click on yours, nothing happens. Fix it please NB: I have the latest version.:

Nice app, but it's very painful to know that the last transaction carried during a transfer is not cleared out automatically but manually. This is this allows a user to make mistakes in subsequent transfers. It's possible to change the account details of the last transaction but forget to change the amount. So please let the last transaction clear out automatically when it is completed. Thank you:

Sadly this app makes life harder. We don't need pretty apps. We need functionality and this app though pretty scores low on functionality. Why would the developers remove all access to our bill recipients for example? On the former app, paying for power was so easy. Now I have a fancy app that ensures I stay in darkness or go through with my bill payments the hard way. Functionality people. Appearance should be an add on.:

The app doesn't support using multiple accounts on it. I navigated through the app I didn't see any where to add account. In my former review, I was told the app was updated to accommodate multiple accounts on it. My saving account is activated on the app. I want to connect my current account too. If your app presently doesn't support it, I suggest zenith Bank uses Finnacle e-banking solutions.:

I am so disappointed at my experience using this app. It keeps on saying network unavailable reconnecting!!! I have tried all I know, gown to your customer service where I was told some mumbo jumbo about it maybe being samsung issue!!!! How sad! I have also noticed same complaints with no real solution here apart from snap n send account details. Can you be more proactive and give a step to step guide as to resolving these issues so we do not have to complain so bitterly?:

No Support for Corporate Accounts. I don't even know if the app works as I am unable to use it for corporate accounts I operate. Don't you think businesses would also appreciate the ease of using an app? ? The Internet Banking is tedious. Plus the iBank platform saves narrations... It's supposed to be useful feature so I can reuse narrations where it applies... However, any transaction done with a previously used narration won't go through. It returns an error of narration used previously. Lol:

Hi Zenith u guys are doing a great job the latest version is cool but I prefer the old version to this new one,it takes time to load , Transaction History is not detailed "the old version shows the Balance Before and After Transaction which gives more clarification but the new only shows only debit or credit transaction without your Balance is really Sad pls try and fix it ,especially the "Transaction History".still prefer the old version how can I get it back,looking forward to the solution.:

Honestly the worst bank app I have used, I have downloaded this app twice in a span of more than 2 years and tried to login after registration just to get the response "wrong details supplied". I have used Zenith Bank for more than 3 years and I have done all my transaction through USSD Code and ATM machines. Lately the USSD Code method is as bad as this (zenith Bank) application and the zenith Bank website. A bank I once considered the best is now nothing close to its previous performance.:

Great app! Wonderful experience each time I log in. However, lasting enhancements can be done once the receipt generation option includes the following: "Sender's full name "Description (which MUST include transfer details such as REFID of every transaction.) "Bank Official Logo watermarked at the centre. "Respond to every email you receive. With all the above in place, every receipt generated becomes an authentic proof of payment. Thanks as you expedite action. Michael Ngwu:

Good evening Zenith, I just opened an account with you and the processes involved were seamless and wow even though it was done online. The only aspect I had difficulty with is the mobile app. After successful registration, I was told I needed to register my device. I downgraded my zenith mobile app but couldn't login because of the existence of a new mobile app version. I got confused initially until I read through some comments posted here. Please, grant us access to the former app. Biko:

It's nice but when I tried marging my second account, I was asked to provide a hard token of which I tried every other options like calling the customer care line, sending my complaints to email address except visiting the Bank which I couldn't do because it's always been a terrible experience due to the long que outside the bank. My point is the vital reason of using the Zenith mobile is the conveniency it provides and to reduce the stress of visiting the Bank. I'll love If I got attended to fr:

I honestly wouldn't recommend this app or bank services to anyone. For some reason they put you on long hold when you call their customer care while deducting from your airtime and also, they deduct your money for odd reasons and when you call to complain you are placed on hold for so long. My money was deducted for the upfront time I go to their bank in made to wait under the sun I send them a msg on IG I got a very rude response. And yet no explanation or reversal. Ver poor customer service:

This app is not a solution app were by you lost your phone or it got spot and you decide to get a new phone. download the app and fill in your bank details,two options will display (pin+token or card details). If you know your pin and you don't know your token pin my dear you will get frustrated or if you fill in your card details my dear it will still not work so the best thing to do is delete the app cause is of no use. This app is a disgrace to human nature and you better fix it up.:

Forget the mobile app this probably the worst bank to ever exist in the face of the planet. Whomever and I mean who ever trying to open an account skip zenith forget all those Google top 5 ZENITH IS THE WORST BANK IN NIGERIA If a 0.00001 star was possible that's what I'll give to them. I mean the app lacks efficiency USD has no network Every branch lacks Network Customers service in 80% branch are rude DO NOT OPEN AN ACCOUNT WITH ZENITH They're hideously poor in services:

Is it a crime to change my mobile device? My wife and I changed our mobile devices, now it's mandatory for us to link our new devices to the app. I went to the nearest branch, they informed me it's gonna work in few hours time. Now over 24hrs, nothing happened, called the customer care line, nothing changed, chatted them online, same thing. I promise them that they're gonna loose 2 good customers in 2days time. Must I go to the bank for something that's so trivial like that all the time?:

This bank they have started packaging their own belongings and go because they are suffering their customers, (1) if you went to the bank to make an deposit you will suffer before you make a deposit. (2) if you want to withdraw your own money you will suffer more than deposit and if you try to use ussd they will be telling you contact your bank for assistance but actually they will not attend you. And for us now in borno state most of the my colleagues they have changed their account salary.:

Terrible banking service of late. First my money of N38,500 is still not refunded to my account. Secondly, your mobile app has a mind of its own, only opens when it wants to. Thirdly, you guys are terrible on small loans to your customers bcuz you don't give out loans. Finally, most of your customer officers are very rude! And lack training in the field of respect and customer relationship. They act like they're doing me a favour when in fact, i'm the reason for their employment! Useless!:

My phone crashed,I got another phone and set up the app,I didn't succeed,I tried chatting customer service, I was told to go to the nearest Zenith bank which at Osapa London,they worked on it and I still can't access my app,when I complained there and then to customer service, I was told it has been set up but they can't understand why i can't log in,the woman whom I was sent upstairs to meet wasn't willing to help,she told me it is not her job,this was in May(2 months ago),this is the end of July,my app still can't open,I have a token that is sitting in my purse useless to me since that time and I was charged for this token!! have been disappointed in Zenith bank since June 2020,some awkward transaction happened in my account which is totally wrong,I used to be a proud Zenith bank customer but with these 2 unpleasant experiences, I can no longer boast of Zenith bank of being a credible bank!! am hoping this gets to the appropriate office and taken care of ASAP to restore my confidence in your bank!my account with Zenith bank dates back to February 2008!looking forward to a reply,thanks in advance!:

Why does it take days before reverting debited account? Many customers are crying because of this insensitive attitude of zenith Bank. It doesn't take so much time before other Banks revert or treat dispense error. I think zenith Bank is no longer effective and efficient in customer service. Try to work on this .
Lockdown should not make the bank loose integrity.:

Can Zenith allow for more volume of transactions possible in terms of transferring money, e.g I can only transfer 150k - 200k too small. What if I have a contract worth millions and needs to make some payments you wouldn't expect me to start carrying funds in a bag do you, such limitations are too low even if d customer is a savings account holder:

This is totally unacceptable, it has the worst customer care support so far. They like posting customers, my experience this Last few weeks has been horrible. If it were within my power I won't give any star at all cos they don't deserve it. At this 21st century, bank like this can't attend to customers online and solve their problem, ordinary reversal of fund for more than two weeks now is hard for them to do. Ur email, social media platforms sucks with live chat not working at all.:

I think Zenith Bank need to work on themselves. Your bank is most worst bank in term of Network &hacking. boys quickly have access to someone account without owner authorised. When you are credited in the morning you will receive alert in the evening and the money will not drop to your account even though you check your balance. In end here I think the bank need to work on IT department something is wrong somewhere. Even App is not functioning well as earlier complained by others user.:

Update: be careful of this bank if you're seeing this. You can see my first complaint below. So I used my Zenith Bank card at POS terminal shop, and the transaction was declined, but they still debited me ₦5,100 and it's been a week now and they have not reversed it. When I report to them they will send me automated messages. I guess I have lost my ₦5,100... Avoid them? ---- I started making use of this bank newly, and someone did a transaction to my Zenith account, and Zenith Bank reversed it.:

Quickest way to dupe you is to use this app. I've used it for Data and others, you will be debited and not getting the Data or recharge. They will promise to refund but till thy kingdom come. Zenith is a fraud. #BoycottZenith. Hello Nigerians, I just contacted Google now, flagging down this app as dubious. I needed 1k people to sign petitions for Google to delist this fraudulent app . Kindly do so reach me on Facebook profile Ricky Awodi:

I hate to say these but with the frustration this app can cause, you would do the same, that i regret banking with zenith bank. The mobile banking is far more worst than any other mobile bank i know. It called mobile banking for a reason,but it kinda works most during Naija working hours . imagine you are outside d Country? So annoying and embarrassing. Imagine not to be able to operate ur own hard earned money. And the customer care will come here and act as if they care. dnt even deserve 1?:

Very poor customer service. They make you wait hours only to meet their workers acting like they are forced to work. Waited for more than 3 hours only to hear the stupid lady say she doesn't know what is wrong with why I'm not able to make transactions. Really??? The woman is at OAU Campus at Ile Ife.
Poor in communication too. Yabbed a lot of innocent customers.

I can't login my mobile banking on my new phone, you know the card details option is not working why do you put it there it's so crazy and stupid.. Zenith bank is getting worse every single day, if you can improve in your service please close the bank and stop stressing yourself customer, even the etoken I can't even process it with my ATM card, zenith is one worst bank in nigeria and as well the world.:

If you are incapable of rendering e-services to your customer, then quit; not denying access to your customers hard earned money. You can spend billions of naira annually marketing to gain more customers but you can't spend a dime to upgrade your services, and meet with the growing demands of your customers. The Nigerian sickness indeed. Just like I did with access bank, which from recent findings is better than zenith bank, I will dump you for other less saturated banks. So annoying ?.:

Very disgraceful that an African Bank will not use Black African models for their app. You open the app and the first model is a foreign woman. What sort of shameful message are you sending to your African girls and children. Shameful for a bank that wants to be global but already forgetting its roots. Disgraceful. Are you ashamed of yourself skin colour? Do you wish you were white? Shame on you zenith bank. Shame on you!!!:

Zenith Bank is now something else you people are not even worth one star talkless of 5, since October 27 I made a transaction 20k with zenith Bank ussd which was not successful but I was debited and not reverse since then they keep telling me the same story that We regret the inconvenience the delayed response might have caused. Please be informed that feedback will be communicated to you once available, see if ogun know want kill you people one after the other return my money back:

Zenith Bank is the worst bank you can ever entrust ur funds with ,they just allow any firm or company to take funds from your account without even asking for you if you made any deal or transaction with the firm or company in question.i have been a victim of this casualty.not even once or twice its concurrent.nd this nonsense happens anytime i receive a credit alert.its as if they are monitoring me Ps.i have proof of this.DONT BANK WITH ZENITH,THEY ARE THIEVS.my 5 ? is for my writin not theirs:

I don't seem to understand the network issues for over a week now, what's really going on? Please help because someone really thinks I'm telling him lies and this has resulted to him insulting me. There's a drastic drop in the quality of services in Zenith Bank has resulted to a gross disappointment here. Even the ATM services are worst. Zenith Bank is a disappointment:

Zenith banks are one of the worst bank in Nigeria. Has a federal or state government workers whose salary account is domicile in their bank,they will not/never grant you any loan. And your salary account is with them. They are very useless. Reason many federal government workers are moving the salary account away from Zenith and going to Get. I have a salary account with the since 2015 they have snevwr granted us loan,if i apply they will be giving stupid story and excuses.:

Zenith bank,Why was I debited for stamp duty twice within 2 weeks apart on the 18th July 2020 and 1st August 2020???? This is fraud. Iv never seen where stamp duty is debited every 2 weeks. I demand that my money be refunded. #750 was taken on the 18th July and #700 on the 1st August. This is crazy Zenith bank. If I don't get a reversal within 48 hours I swear I will stop banking with Zenith. I thought Zenith was prestigious. Found out they are cheats. I am waiting for a reversal:

God punish all of u that is in charge of this zenith bank? just look at the way u remove money from my account all in the name of sms fee and after every transaction u remove 10.75k and sometimes 20.75k.... Even if I transfer from zenith to zenith on bank app for that matter, u still remove charges... And after everything u still comeback to withdraw money for sms fee?... Once again may God punish u all?... God punish u all?..:

How can I be locked out of my account and tried logging in back, you're requesting for a hardware token?? This is the lowest I have had it with you guys. I'm far away in a town in Jigawa and there isn't a Zenith Bank branch there, how do you expect me to get to branch with the population of people inside and outside those banks coupled with Covid restrictions?? What is wrong with y'all, why don't you make life easy for people you make money from??:

Indeed for some months now, i can not share the receipt for a transaction to my contacts or any other app on my phone. Immediately after a successful transaction, a receipt will be generated, it can only be downloaded but cannot be shared with the recipient or any other app. This is ridiculous indeed as it has a bottleneck for some time now and seems like ZENITH BANK is not doing anything to rectify this issue as take. So disappointed indeed.:

A complete fiasco! Isn't there a zero rating alternative? No, I didn't come here about the mobile app. I'm here about how frustrating the network issue has been over the past months. You can bet your neck that it'll always cost you heartaches and a feeling of utmost helplessness whenever one needs to transact with the USSD code alternative. This poor network issue has costed and is still costing me more than my funds! Dam! I'm quitting my partnership with them soonest! It sucks! Terribly sucks!:

Zenith bank app just became a shadow of its former self. It's very disheartening to say the least of how your services has dropped recklessly. The disgusting part is how it still doesn't seem like y'all care about it or effect visible positive changes. I've been with this bank since 2005, it used to be my go-to bank for transactions until this very moment. Now, if your app isn't killing transactions at point of payment, your card is keeping you stranded and embarrassed in front of a cashier.:

This is very helpful it's like bringing the bank to your doorstep 24 hours. 1. A faster signing in process will be good 2. I should be able to access full account records for as long as I've been keeping my account with Zenith 3. Extended transaction records beyond the few available now. If this are achieved, a 5 star rating maybe feasible:

I wonder what is wrong with you guys. This app used to be a great one. Now I can't login. Ussd code not working. I was told no account linked to my number. The same number I have been using to make transfers. It's pathetic. You should fix this. Am so disappointed. Dropping the ratings to a star ?:

Best bank ever! Working hard to keep the glory of the name, Zenith bank app speaks loud and clear for itself. Quick access, fast transaction processing and with super-duper design. Forever my best choice!!:

I need help. This app will no longer work on my galaxy Note 10 plus. It just keeps loading and never even gives an error message. I have contacted customer care 4 times including by mail but no one has been able to help me. I have cleared data and cache, reinstalled, restarted, done everything I know how. It is the only app that won't work on my phone:

This app has been working quite nicely until recently I would log in and it takes forever to open, often times it just keeps running like the it couldn't connect to the server or something else. It's so annoying that the once wonderful app has become lagging.:

Honestly, since you updated the app, it has not been smooth as it was before. In most cases it refused to connect giving error message: network not available. Reconnecting.... And remain like that until I have to switch off the phone before exiting. I have not enjoyed it at all. This app has not connected for the past three days now. You guys need to review this app..

the new update is terrible; the worst app so far. can't even load to log in, its busy doing reconnecting, when other apps are opening, even the play store. I regretted updating the app. pls can we just have the options of using the old app that was working just fine? pls I beg u.
plss what I usually do in one minute, now I can't even make payment on a timeline for a job. very sad:

Most other banks' apps allow you to view a transaction receipt on the app (not email), showing full details of the transaction. So you guys spent millions to build a whole new app but your engineers couldn't include this simple but most vital feature. A huge failure I must tell you:

Review number: 13547

Great new UI please change the UX do that transaction history does not require this painfully long process of filtering the months and please sort transactions chronologically and also we don't need email for every login. Thanks.:

The new upgrade to the app requires token to access my account. Why? Why isn't there an option to generate a transaction receipt on the app? I had needed this several times, it should be the usual practice. Please fix:

If I could I will give this app a zero rating I was helpless during the holiday and needed to buy airtime and do some transfers all to no avail. I could neither use my mobile ussd nor the mobile app. Zenith bank is completely hopeless not to talk of their customer care, the lady I chatted with online ignored me for minutes and didn't even bother to help me find a solution.:

Review number: 13957
Review by - A Google user

Date and time - 2018-08-07 12:05:13:
This app version is too old compared to other banks I just opened a zenith bank account last week and downloaded their app, imagine my surprise when i realised they don't have biometric log in? So many errors while trying to do one thing or the other! From a bank that claims to be the best, I'm woefully disappointed????:

Score - 1:

Date and time - 2018-08-25 18:14:48:

It's frustrating anytime I want to make transfer. You can hardly make 5 successful transactions without the app crashing. It will show network error and I will be debited. Any little fluctuations in network it log you out.:

I had to write a review. The User interface of this app is the worst that exist anywhere. I thought the functionality of it will knock out its whack UI. But No, they describe their own error messages like its your fault e.g Network Error, activate your mobile no...when I need to try ten more times to login successfully. Good side, my transactions have not stuck yet. Please Zenith catch up. Thanks:

The app is easy to use but I abandoned using it due to the fact that it doesn't generate Receipt when payment is made and the message that states the transfer is successful also has the account balance, hence couldn't be screen grabbed. They should work on that please.:

This app is very poor.... I expected more from this Bank Pls update this app You're making me wish I had an Access Bank account instead because that app is beautiful compared to this garbage you guys call an app I even had to come back and check to see if this was the official Zenith Bank app cuz it looked like a very fake thing Pls update this app It is SEVERELY outdated:

Rubbish.. After going thru registration process successful, I try to transfer money to UBA account number and after the transfer I still have to confirm my transaction by dialing short codes which didn't work. I have tried several times but it is not working. Here my suggestion. The App should be make simple and all the transaction confirmation should be within the App not necessarily dialing short code. The error message was that is should check my token. And most times I don't get any error message:

Great app dats made my life easier to transfer and receive funds but it has a FUNDAMENTAL FLAW. When I type in the Acct. no of someone to whom I want to send money to, no confirmation of the Acct. name is asked for. Just one wrong number typed in error and I could send money to the wrong person. To get it back go be wahala. So please put in a next step for Acct. name confirmation before money's sent.:

Can't remember when last I went to a bank, u can do virtually all transactions easily at your fingertips. I have 2 questions: (1.) Pls my transaction history does nt show more than 3 transaction on my android phone bt shows all on my iPhone (2.) I can't setup a standing order in recurring payment (it only pays once). Pls help rectify this issues:

I actually prefer using the mobile app to the desktop ibanking platform. It's so user friendly. You can transfer to other banks without saving the beneficiary (and then you get the prompting to save or not which I love since some transfers are one-off) so it saves you having to come back and delete the beneficiary. As my children will say "Good job!"

Eventually after days of frustration, I was able to get the app running. I had to uninstall and reinstall it then things started running as they were. The app is really nice and smooth though taking longer time to load than the old one. The developers need to work on the red colour that appears behind the logo at first launch, it's kinda scary, maybe make it more lighter or do white and interlace it with red. Outside that you have a perfect app.:

I guess you guys should make a feature of complaints available so we dont have to walk-in all the time we have to complain about something or make a request. Comparing with GtBank app, I think its more or less supposed to be a one stop bank..... I need to be able to purchase my flight tickets at discounted price and all other things like cinemas and stuffs. Thank you:

There's no issue regarding not been able to confirm acc details before your transaction is completed, however, there's an automatic update of the acc inform if you select "other bank" (in situation where the acc is not zenith acc), hence there's no flaws on that issue as regard confirmation of acc details, even the previous app has that function. Cheers.:

Well, I have been using this app for close to a year now and its been helpful, provided I'm using the same Sim I used in registering I don't have any challenge at all. I just got a new phone that uses two sims, downloaded d app and logged in and there, I had no problem. Just make sure u r doing the right thing. Its not magic, its technology:

This is actually a very nice app but the only problem i have is whenever i try to use my second sim to access it i get a message 'please register your device first'. This days alot of people are using a dual sim phone where you can switch your data to any of the sims. Making the app registered to only one sim is a lil boring. Please if you fix in the next update. But generally a very nice app.:

Still surprised as to why I have been unable to log in despite waiting for more 24 hours as my banking officer instructed. Pls can someone help me here. System repeatedly told me this account no is not allowed here. It says i should visit or call. I did call at lekki branch. I was told that my banking officer/my branch will help out. But I am surprised that upto now both my banking officer/okota branch has done nothing about it. My formal banking officer was right asking me to switch to his new bank.:

It's pointless when it can't be used on multiple devices(more than 3). The pin-token is enough security so don't understand why. Its also useless if it keeps instructing an existing user trying to login to re-register the device again. That prompts me to delete and reinstall and now it says i cant register it since I have done that on 3 devices. I've only ever had it on one device but been forced to reinstall on 2 occasions and now it talking nonsense, saying ive registered 3 devices.:

The app is ok. The challenge I think am having here is dialing of code. Its disgusting. I was unable to make transfers. The code not working. I don't even like the idea of using a code confirmation. Its disgusting. My other bank (diamond bank) don't use any code dialing confirmation. You can use it anywhere, in Nigeria and outside Nigeria. Zenith bank should please do something about that. You are bigger than that..

The UI is crisp and clean. Instructions are clear. Of course the user will need a strong internet connection to avoid hitches. However, I encountered an "Internal Error" upon processing a transaction. Which almost led to a duplication payment. I received a message from the App that there was a possible duplicate and I should check my balance. Good thing there wasn't. Overall good App. Needs improvement.:

I love this app. It runs very smoothly on android devices unlike its peers. It is simple to use, multi functional and bug-free. The possibility of registering 3 devices caps it all. you dont know what you are missing until you try it. Thumb up for you guys in zenith.:

This app is just trash except zenith bank upgrades their system . Once I needed to make an urgent cash transfer and I registered the app on my Gf's phone,now I have downloaded the app on my mobile and am unable to use it cos it says am already registered meaning I can only use first phone in which I registered? That's just gross u can't call that security measures. This is the 21st century where people ditch their old mobile for a newest version.:

Sometime ago I rated the app one star because there were some challenges with it. But now, I've not installed any better application than this. I works perfectly. Even when u forgot to log out it makes sure that no further transaction is done on ur account once ur phone is locked. When u reopen you'd have to impute ur password again to avoid a 3rd party snooping on ur account due to ur own carelessness.:

This app has saved me so many trips to the bank. I have hardly ever had cause to be disappointed when doing cash transfers especially within ZenithBank. However the app is only useful for money transfers. Do NOT buy airtime on the app. You will lose your money and even Customer Care cannot help you get it back!!!:

Review number: 16362

This app works perfectly. However, checking balance seems to be a problem. I only managed to do that once since I installed the app. A new update is needed urgently for balance check on eaZymoney & bank accounts. We also need to check last 3 or 5 transaction on eaZymoney & bank accounts. Oh I think I got it somehow - though not easy since it needs pulling down the letters and refreshing. Great App - needs to score as high as 4.7:

As expected, everyone wants my phone number. Another BAD APP. You must look for a way of authenticating people without asking for their phone numbers. We already have enough codes to cram on your ebanking. I think you should be able to adapt them for this mobile app. Asking for phone number (just like Quickteller) is not imaginative at all. The same reason I never bothered with it I'm UNINSTALLING. When you guys find an intuitive way of doing this, let me know. Otherwise, I'll stick to ebanking on the web:

Sets the bar a notch higher but i'm sure these Zenith guys have a lot more up their sleeves in the coming weeks. Its original. Its also secure, intuitive, crisp and clean. Its probably the only app supported on both very old Android OSs and economically friendlier phones with small screens like the Huawei Gaga but also on high end Samsungs covering both customer segments - catering for everyone. Well done Zenith team, well done. Suggestion - please don't make us have to go to a branch to link our account to wallet.:

For Safety sake what does a banking app have to do with add, edit and delete contacts? Shared media? So it can also view and edit my pictures, files and folders? Please be careful dis app will steal your contact and photos because it has unfettered access to these info. Developers tell us the truth THIS IS A SPOOFING APP not a banking app. USERS BEWARE:
